

I am writing this now to urge Chairman Powell to change the date to consider loosening the rules on media ownership. There has been little opportunity for democratic debate on this topic. Even Congress has asked for a later date so that they may discuss what the FCC is considering.

I greatly oppose the lifting of regulations on media ownership. There is already little diversity in the media today, and I feel that loosening the current regulations can have NO positive impact on society, outside of the personal gains of the corporations.
